

This Patient Group Direction (PGD) must only be used by registered healthcare professionals who have been named and authorised by their organisation to practice under it. The most recent and in date final signed version of the PGD should be used.

## **PATIENT GROUP DIRECTION (PGD)**

### **Supply of Azithromycin 250mg/500mg Tablets for the treatment of uncomplicated asymptomatic *Chlamydia trachomatis* in Community Pharmacy**

#### **PGD DEVELOPMENT GROUP**

Date PGD template comes into effect	April 2024
Review date	February 2026
Expiry date	March 2026

#### **Version Control**

The current version of this document can be found on Pharmoutcomes and the LPC website.  
<https://www.sps.nhs.uk/articles/azithromycin-oral-for-use-within-sexual-health-services/>

Amendments may become necessary prior to the published expiry date. Contractors who are commissioned to provide the service will be notified of any amendments and provided with updated documentation for use by individual practitioners.

- Practitioners and organisations must check that they are using the current version of the PGD.

#### **Revision History**

Version	Date	Author	Change description
1.0 / 2021	Nov 2021	Andrew Pickard	New PGD
2.0 / 2022	Feb 2022	Andrew Pickard	Local update
3.0 / 2024	March 2024	Mercedeh Fahimi-Vahid	Update and amend format

Insert logo of authorising body

## ORGANISATIONAL AUTHORISATIONS

Telford and Wrekin Council and Shropshire Council authorise this PGD for use by accredited Community Pharmacists delivering the service from community pharmacies that meet the requirements as outlined in the service specification and that have been commissioned by Telford and Wrekin Council and/or Shropshire Council.

It is the responsibility of the organisation that has legal authority to authorise the PGD, to ensure that all legal and governance requirements are met.

The authorising body accepts governance responsibility for the appropriate use of the PGD.

This document requires authorisation by the following individuals:

Name and Designation	Organisation	Signature	Date
Liz Noakes Statutory Director of Public Health	Telford and Wrekin Council		26.03.2024
Rachel Robinson Consultant in Public Health / Deputy Statutory Director of Public Health	Shropshire Council		26/03/2024
Elizabeth Walker Deputy Director Medicines Management	NHS Shropshire Telford and Wrekin Integrated Care Board		25/03/2024
Dr Arabinda Kundu Consultant/Clinical Lead in Sexual Health	Midlands Partnership Foundation Trust		26/03/2024

**Characteristics of staff**

<p><b>Qualifications and professional registration to be held by staff undertaking PGD</b></p>	<ul style="list-style-type: none"> <li>▪ Pharmacist with current General Pharmaceutical Council registration.</li> <li>▪ Pharmacist authorised by Telford and Wrekin Council and/or Shropshire Council to provide a Chlamydia Treatment Service as per the Service Specification.</li> <li>▪ Pharmacist is required to have suitable indemnity insurance.</li> </ul>
<p><b>Initial training</b></p>	<ul style="list-style-type: none"> <li>▪ The registered pharmacist authorised to operate under this PGD must have undertaken appropriate education and training and successfully completed the competencies:             <ul style="list-style-type: none"> <li>- to undertake clinical assessment of patient leading to diagnosis of the condition listed</li> <li>- to have a clear understanding of the drug to be administered including side effects, contraindications, and interactions.</li> <li>- to ensure safe provision of the medicines listed in accordance with the service specification.</li> </ul> </li> <li>▪ Individuals operating under this PGD must have a clear understanding of the legal requirements to operate a PGD <a href="#">Overview   Patient group directions   Guidance   NICE</a></li> <li>▪ Recommended training for working under PGDs for the supply and administration of medicines - <a href="#">eLfh PGD elearning programme</a></li> <li>▪ Completion of the current CPPE training packages on Sexual Health in Pharmacies <a href="#">Sexual health in pharmacies : CPPE</a> and Safeguarding Vulnerable Adults and Children <a href="#">Safeguarding (cppe.ac.uk)</a></li> <li>▪ Completion of the CPPE learning pack – Combating Child Sexual Exploitation (CSE): An e-learning resource for healthcare professionals <a href="#">Combating CSE - An e-learning resource for healthcare professionals: CPPE</a></li> </ul>
<p><b>Competency assessment</b></p>	<ul style="list-style-type: none"> <li>▪ Individuals operating under this PGD must:             <ul style="list-style-type: none"> <li>- be assessed as competent (see Appendix A) or complete a self-declaration of competence for Chlamydia testing and/or treatment <a href="#">Declaration of Competence for pharmacy services - Chlamydia Testing and Treatment Service</a>.</li> <li>- be competent to follow and administer PGD showing clear understanding of indications for treatment (and subsequent actions to be taken), and the treatment itself.</li> </ul> </li> <li>▪ Individuals operating under this PGD are encouraged to review their competency using the <a href="#">NICE Competency Framework for health professionals using patient group directions</a></li> </ul>
<p><b>Ongoing training and competency</b></p>	<ul style="list-style-type: none"> <li>▪ Individuals operating under this PGD have a personal responsibility to ensure their on-going competency by continually updating their knowledge and skills.</li> <li>▪ Attendance at a local training event(s) approved by Telford and Wrekin Council and/or Shropshire Council is recommended where these are organised, but this is not a prerequisite for delivering this service.</li> </ul>
<p>The decision to supply any medication rests with the individual registered health professional who must abide by the PGD and any associated organisational policies.</p>	

**Clinical Details**

<p><b>Clinical condition or situation to which this PGD applies</b></p>	<ul style="list-style-type: none"> <li>▪ Uncomplicated asymptomatic genital chlamydia trachomatis infection.</li> <li>▪ Asymptomatic individuals presenting within 2 weeks of sexual contact with an individual with a confirmed diagnosis of chlamydia trachomatis infection.</li> </ul> <p><b>The use of azithromycin is considered second line treatment for asymptomatic chlamydia infection if doxycycline is contra-indicated.</b></p>
<p><b>Aims</b></p>	<p>To reduce the risks of short- and longer-term complications associated with chlamydia infection such as pelvic inflammatory disease and tubal infertility.</p>
<p><b>Criteria for inclusion</b></p> <p>Use BNF/BNFC/SPC. Consider any clinical guidelines or policies that are available locally or nationally, e.g. <a href="#">BASHH</a> / <a href="#">NICE</a></p>	<ul style="list-style-type: none"> <li>▪ Informed consent is given.</li> <li>▪ <b>Where doxycycline is contraindicated</b> (known allergy, previous adverse effects, pre-existing medical conditions, pregnancy, or breastfeeding) <b>or inappropriate</b> (photosensitivity, likely poor adherence):             <ul style="list-style-type: none"> <li>- Individuals aged 15 years and over with a positive test result for Chlamydia trachomatis infection in the genitals following screening, but without signs suggestive of complications/remains asymptomatic.</li> <li>- Asymptomatic individuals presenting within 2 weeks of sexual contact with an individual with a confirmed diagnosis of Chlamydia trachomatis, who are unwilling/unable to defer testing after the 2-week window period.</li> <li>- A single repeat treatment course for individuals who have had sexual intercourse within 7 days of receiving treatment or who have had sex with partner untreated for the above conditions.</li> </ul> </li> </ul>
<p><b>Criteria for exclusion</b></p>	<ul style="list-style-type: none"> <li>▪ Informed consent not given.</li> <li>▪ Individuals under 15 years of age.</li> <li>▪ Individuals &lt;18 years of age with a body weight of &lt;45kg- (alternative dosage forms are available for this cohort NB: this falls outside this PGD)</li> <li>▪ Individuals under 16 years old and assessed as lacking capacity to consent using the Fraser Guidelines. <a href="#">Gillick competency and Fraser guidelines</a></li> <li>▪ Individuals 16 years of age and over and assessed as lacking capacity to consent.</li> </ul> <p><b>Medical history</b></p> <ul style="list-style-type: none"> <li>▪ Symptoms suggestive of other STIs such as unusual vaginal discharge, or penile discharge ; suspected and/or confirmed symptomatic rectal Chlamydia trachomatis.</li> <li>▪ Individual with complicated Chlamydia trachomatis infection such as epididymitis and/or testicular pain or a clinical diagnosis of Pelvic Inflammatory Disease (PID).</li> <li>▪ Individuals with suspected or confirmed Lymphogranuloma venereum (LGV).</li> <li>▪ Known or suspected proctitis/prostatitis.</li> <li>▪ Urethritis.</li> <li>▪ Known severe hepatic impairment.</li> <li>▪ Known severe renal impairment (eGFR &lt;10ml/min/1.73m<sup>2</sup>/ CKD stage 5)</li> <li>▪ Current/past history of cardiac disease, cardiac rhythm or conduction disturbance.</li> <li>▪ Electrolyte disturbances, particularly hypokalaemia/ hypomagnesaemia</li> <li>▪ Presence of concomitant conjunctivitis and/or joint pain/swelling</li> <li>▪ Acute porphyria</li> <li>▪ Myasthenia gravis</li> </ul>

	<ul style="list-style-type: none"> <li>▪ Rare hereditary problems of galactose intolerance, total lactase deficiency or glucose-galactose malabsorption</li> </ul> <p><b>Medication history</b></p> <ul style="list-style-type: none"> <li>▪ Any concurrent interacting medicine(s) where interaction is severe or clinically significant – see Drug Interactions section.</li> <li>▪ Concomitant use of another medication known to cause QT prolongation (e.g. haloperidol, sotalol, terfenadine, pimozone) (For further information recommended resources include: <a href="#">CredibleMeds</a>; registration required, or <a href="#">Sudden arrhythmic death syndrome (SADS) - Drugs to avoid</a>)</li> <li>▪ Concomitant use of ergot derivatives such as ergotamine (Migril®)</li> <li>▪ Known hypersensitivity or allergy to the azithromycin or other macrolide antibiotics or to any component of the product - see <a href="#">Summary of Product Characteristics - Azithromycin</a></li> <li>▪ Individuals with known azithromycin resistance.</li> </ul> <p><b>Please refer to current BNF <a href="https://bnf.nice.org.uk/">https://bnf.nice.org.uk/</a> and SPC for full details <a href="https://www.medicines.org.uk/emc/">https://www.medicines.org.uk/emc/</a></b></p>
<p><b>Supply to young persons</b></p>	<ul style="list-style-type: none"> <li>▪ If the individual is less than 16 years of age, then they must be assessed for competency based on Fraser guidelines. If they are deemed as being 'Fraser Competent' then a supply can be made and documented in the records.</li> <li>▪ Pharmacists must use their professional judgement when considering 'Safeguarding' issues related to sexual activity in young persons.</li> <li>▪ If the presenting individual under 13 years of age requests treatment for chlamydia, and there is a reasonable concern that sexual activity has taken place, the pharmacist should always speak to local safeguarding lead and follow the local safeguarding policy. (Note under 15 years of age excluded from treatment under this PGD).</li> <li>▪ Local contacts:             <ul style="list-style-type: none"> <li>- <a href="#">Family Connect</a> in Telford and Wrekin (01952 385385 / after 5pm and on weekends contact the emergency duty team 01952 676500) or</li> <li>- Initial Contact Team in Shropshire (0345 678 9021 / Out of hours - 0345 678 9040) <a href="#">Safeguarding Children</a> / <a href="#">Shropshire Council Useful Contacts</a></li> </ul> </li> <li>▪ There must always be a presumption that the case will be referred to the Children's Social Care Services in the area where the child lives. A record of the referral should be maintained in the pharmacy. The pharmacy may also adopt: <a href="#">Regional Child Protection Procedures for West Midlands</a></li> <li>▪ <b>If you think the child or young person is in immediate danger telephone 999</b></li> </ul>
<p><b>Action to be taken if the individual is excluded or declines treatment</b></p>	<ul style="list-style-type: none"> <li>▪ If declined ensure individual is aware of the need for treatment and the potential consequences of not receiving treatment.</li> <li>▪ Record reason for decline in the consultation record.</li> <li>▪ Explain the reasons for exclusion to the individual and document in the consultation record and/or PharmOutcomes.</li> <li>▪ Where required refer the individual to a suitable health service provider e.g. refer to Sexual Health Clinic (0300 123 0994) or the individuals GP and/or provide them with information about further options.</li> <li>▪ Pregnant individuals / individuals known to be at risk of pregnancy who decline azithromycin treatment should be referred to a prescriber for further consultation.</li> </ul>

<b>Management of individuals requiring referral</b>	<p>Where required refer the individual to a suitable health service provider and document referral details in patient records and/or PharmOutcomes</p> <ul style="list-style-type: none"> <li>▪ Female with pelvic pain, consider immediate referral to Sexual Health Clinic (0300 123 0994). If pain severe, refer to local A&amp;E department.</li> <li>▪ Symptoms suggestive of other STI – consider immediate referral to Sexual Health Clinic</li> <li>▪ Male with scrotal pain, consider immediate referral to local A&amp;E department.</li> <li>▪ If vomiting occurs within 2 hours of taking initial dose, refer to Sexual Health Clinic or GP for re-evaluation.</li> </ul>
---	---

### Description of treatment

<b>Name, strength &amp; formulation of drug</b>	Azithromycin 250mg or 500mg tablets
<b>Legal category</b>	Prescription Only Medicine (POM)
<b>Route of administration</b>	Oral
<b>Storage</b>	Medicines must be stored securely according to national guidelines and in accordance with the products SPC: <a href="#">Azithromycin 500mg Tablets</a> / <a href="#">Azithromycin 250mg film-coated tablets</a>
<b>Off label use</b>	<p>Best practice advice is given by <a href="#">BASHH</a> and is used as the reference guidance in this PGD and may vary from the <a href="#">Summary of Product Characteristics (SPC)</a>.</p> <p>This PGD includes off label use in the following conditions:</p> <ul style="list-style-type: none"> <li>▪ The dose of azithromycin stated in the BASHH guideline and therefore in this PGD is higher than the licensed dose.</li> <li>▪ Breastfeeding individuals – BASHH states that ‘Very low levels of azithromycin are detected in breast milk, and systemic exposure in infants does not exceed that observed when azithromycin is administered for treatment, therefore risk is considered to be low’.</li> </ul> <p>Medicines should be stored according to the conditions detailed in the Storage section. However, in the event of an inadvertent or unavoidable deviation of these conditions the local pharmacy or Medicines Management team must be consulted. Where medicines have been assessed by community pharmacy/Medicines Management in accordance with national or specific product recommendations as appropriate for continued use this would constitute off-label administration under this PGD. The responsibility for the decision to release the affected drugs for use lies with community pharmacy / Medicines Management.</p> <ul style="list-style-type: none"> <li>▪ Where a medicine is recommended off-label consider, as part of the consent process, informing the individual/parent/carer that the drug is being offered in accordance with national guidance but that this is outside the product licence.</li> </ul>
<b>Dose and frequency of administration</b>	<p><b>Day One:</b> 1g taken as a single dose  <b>Day Two:</b> 500mg once daily  <b>Day Three:</b> 500mg once daily</p> <ul style="list-style-type: none"> <li>▪ The tablets can be taken with or without food with a glass of water.</li> <li>▪ The remaining daily doses should be taken at the same time each day.</li> </ul>

<b>Duration of treatment</b>	3 days.
<b>Quantity to be supplied</b>	<ul style="list-style-type: none"> <li>▪ Appropriately labelled pack of 4x500mg tablets or 8x250mg tablets.</li> <li>▪ The wording ‘Supplied via PGD’ should also be added to the label.</li> <li>▪ A single repeat course can be supplied under the PGD if vomiting occurs within 3 hours of a dose being taken.</li> </ul>
<b>Drug interactions</b>	<p>All concurrent medications should be reviewed for interactions. The list of interactions and information given below is not exhaustive, a detailed list of all drug interactions is available in the <a href="#">BNF</a> or the product <a href="#">SPC</a>. Seek advice from an appropriate clinician/Medicines Advisory Service if required.</p> <p><b>Individuals concurrently prescribed the following medications are excluded from treatment under this PGD and must be referred to an appropriate prescriber:</b></p> <ul style="list-style-type: none"> <li>- Berotralstat</li> <li>- Chloroquine</li> <li>- Colchicine</li> <li>- Dabigatran</li> <li>- Digoxin</li> <li>- Edoxaban</li> <li>- Hydroxychloroquine</li> <li>- Rifabutin</li> <li>- Talazoparib</li> <li>- Ticagrelor</li> <li>- Topotecan</li> <li>- Vinblastine</li> <li>- Vincristine</li> <li>- Vindesine</li> <li>- Vinflunine</li> <li>- Vinorelbine</li> <li>- Concomitant use of another medication known to cause QT prolongation (e.g. amiodarone, haloperidol, sotalol, terfenadine, pimozide) (For further information recommended resources include: <a href="#">CredibleMeds</a>; registration required, or <a href="#">Sudden arrhythmic death syndrome (SADS) - Drugs to avoid</a>)</li> <li>- Concomitant use of ergot derivatives such as ergotamine (Migril®)</li> </ul> <p>The SPC highlights important, clinically significant interactions as follows:</p> <ul style="list-style-type: none"> <li>▪ <b>Warfarin</b> — occasionally and unpredictably, the effects of warfarin may be markedly increased by macrolides. <ul style="list-style-type: none"> <li>○ Monitor the international normalized ratio (INR), and adjust the warfarin dose accordingly.</li> </ul> </li> <li>▪ <b>Statins</b> — the manufacturer reports post-marketing cases of rhabdomyolysis in people taking azithromycin with statins. <ul style="list-style-type: none"> <li>○ Advise the person to report any muscle pain, tenderness, or weakness.</li> </ul> </li> <li>▪ <b>Ciclosporin</b> — azithromycin can affect clearance of ciclosporin. If co-administration of these drugs is necessary, ciclosporin levels should be monitored and the dose adjusted accordingly</li> <li>▪ <b>Ergot derivatives</b> - Due to the theoretical possibility of ergotism, the concurrent use of azithromycin with ergot derivatives is contra-indicated in this PGD.</li> </ul>

	<ul style="list-style-type: none"> <li>▪ <b>Antacids</b> – can reduce peak serum concentrations of azithromycin so must not be taken at the same time. Azithromycin must be taken at least 1 hour before or 2 hours after antacids.</li> <li>▪ <b>Digoxin and Colchicine</b> – concomitant administration can result in increased serum levels of digoxin and colchicine and therefore signs of toxicity should be monitored.</li> <li>▪ <b>Hydroxychloroquine and chloroquine</b> - Observational data have shown that co-administration of azithromycin with hydroxychloroquine in patients with rheumatoid arthritis is associated with an increased risk of cardiovascular events and cardiovascular mortality. A similar potential risk is associated with chloroquine and therefore concurrent use with azithromycin is contraindicated in this PGD.</li> <li>▪ <b>Drugs that prolong the QT interval</b> (such as amiodarone, sotalol, terfenadine, and amisulpride) — all macrolides can prolong the QT interval, and concomitant use of drugs that prolong the QT interval is not recommended.</li> <li>▪ <b>Drugs that cause hypokalaemia</b> (such as diuretics, corticosteroids, short-acting beta-2 agonists) — hypokalaemia is a risk factor for QT prolongation.</li> </ul>
<p><b>Cautions including any relevant action to be taken</b></p>	<p>A detailed list of Special warnings and precautions for use is available in the <a href="#">SPC</a></p> <ul style="list-style-type: none"> <li>▪ Visual impairment and vision blurred may have an effect on a patient's ability to drive or operate machinery.</li> <li>▪ Dizziness and drowsiness may occur with azithromycin.             <ul style="list-style-type: none"> <li>- Individuals experiencing these side effect should avoid driving or operating machinery.</li> </ul> </li> <li>▪ Pseudomembranous colitis should be considered in patients who get diarrhoea after starting treatment with azithromycin.</li> <li>▪ Treatment with antibacterial agents alters the normal flora of the colon leading to overgrowth of <i>C. difficile</i>.             <ul style="list-style-type: none"> <li>- <i>Clostridoides difficile</i> associated diarrhoea (CDAD) must be considered in all patients who present with diarrhoea following antibiotic use [may range in severity from mild diarrhoea to fatal colitis].</li> <li>- Careful medical history is necessary since CDAD has been reported to occur over two months after the administration of antimicrobial agents.</li> <li>- In case of CDAD anti-peristaltics are contraindicated.</li> </ul> </li> <li>▪ Some brands of azithromycin contain soya or soya lecithin and are therefore contraindicated in individuals with an allergy to soya or peanuts. If individual is allergic, check manufacturer's information for brand being used and select an alternative suitable brand if available.</li> <li>▪ Pregnant individuals/individuals known to be at risk of pregnancy – the SPC states that there is limited data on use in pregnancy however BASHH guidelines state: "While adverse pregnancy outcomes are unlikely with the 2g total azithromycin dose, individuals should be advised of the lack of data." The individual must be informed that although the use of azithromycin in pregnancy is thought to be safe, there is limited research available and be fully informed of the risks and benefits of this treatment.</li> </ul>

	<ul style="list-style-type: none"> <li>▪ Breastfeeding individuals – BASHH states that 'Very low levels of azithromycin are detected in breast milk, and systemic exposure in infants does not exceed that observed when azithromycin is administered for treatment, therefore risk is considered to be low'.</li> <li>▪ If the individual is less than 16 years of age an assessment based on Fraser guidelines must be made and documented.</li> </ul> <p>Discuss with appropriate medical/independent non-medical prescriber any medical condition or medication of which the healthcare professional is unsure or uncertain.</p>
<p><b>Identification of adverse reactions</b></p>	<p>A detailed list of adverse reactions is available in the <a href="#">SPC</a> and <a href="#">BNF</a></p> <p>The following side effects are very common/common with azithromycin:</p> <ul style="list-style-type: none"> <li>▪ Nausea</li> <li>▪ Anorexia</li> <li>▪ Vomiting</li> <li>▪ Dyspepsia</li> <li>▪ Dizziness</li> <li>▪ Headache</li> <li>▪ Diarrhoea</li> <li>▪ Abdominal pain/discomfort</li> <li>▪ Flatulence</li> <li>▪ Rash</li> <li>▪ Pruritus</li> <li>▪ Arthralgia</li> <li>▪ Fatigue</li> <li>▪ Visual impairment</li> <li>▪ Deafness</li> <li>▪ Paraesthesia</li> <li>▪ Dysgeusia</li> </ul>
<p><b>Management of and reporting procedure for adverse drug reactions (ADR)</b></p>	<ul style="list-style-type: none"> <li>▪ Individuals should be advised of common side effects and management.</li> <li>▪ An individual presenting with a suspected serious ADR should be referred to their GP.</li> <li>▪ Individuals should be advised to seek urgent medical attention if they develop early symptoms of anaphylaxis such as breathlessness or swelling.</li> <li>▪ Healthcare professionals and patients/carers are encouraged to report suspected adverse reactions to the Medicines and Healthcare products Regulatory Agency (MHRA) using the <a href="#">Yellow Card reporting scheme</a></li> <li>▪ Record all ADRs in the individual's medical record.</li> <li>▪ Report any adverse reactions via organisation incident policy.</li> </ul>
<p><b>Written information and further advice to be given to individual</b></p>	<p><b>Medication:</b></p> <ul style="list-style-type: none"> <li>▪ Give patient information leaflet (PIL) provided with the original pack. Explain mode of action, side effects, and benefits of the medicine</li> <li>▪ Azithromycin tablets can be taken at any time in relation to food.</li> <li>▪ If vomiting occurs within 3 hours of taking tablets offer option of repeat dose of azithromycin (under PGD).</li> <li>▪ Where possible avoid the use of antacids.             <ul style="list-style-type: none"> <li>- In patients receiving both azithromycin and antacids, the medicinal products should not be taken simultaneously, but with an interval of azithromycin being taken at least one hour before or 2 hours after the antacid.</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>▪ In females taking oral contraceptives, if they do experience vomiting or have severe diarrhoea for more than 24 hours after taking azithromycin tablets, this may lead to contraceptive failure. Refer to the instruction leaflet included with the relevant oral contraceptive pill to manage the risk of contraceptive failure.             <ul style="list-style-type: none"> <li>- There is no interaction between azithromycin and oral contraceptives; the warning is related to the risk of vomiting/diarrhoea after taking azithromycin.</li> </ul> <p><a href="http://www.nhs.uk">Common questions about azithromycin - NHS (www.nhs.uk)</a></p> </li> </ul> <p><b>Condition:</b></p> <ul style="list-style-type: none"> <li>▪ Individuals diagnosed with Chlamydia trachomatis should be offered information (verbal, written and/or digital) about their diagnosis and management.</li> <li>▪ Discuss implications of incompletely treated/untreated infection of self or partner/s.</li> <li>▪ Advise to abstain completely from sexual intercourse (even with condoms) including oral sex, during treatment, for 7 days after treatment and for 7 days after partner(s) treatment. Where not achievable, advise on use of condoms.</li> <li>▪ Discuss risk of re-infection, and further transmission of infection, if after treatment sexual intercourse takes place with an untreated partner/s.</li> <li>▪ All individuals with confirmed chlamydia infection should be advised to contact their local sexual health clinic for partner notification purposes.</li> <li>▪ All individuals with confirmed chlamydia infection should be encouraged to be screened for other sexually transmitted infections (STIs).</li> <li>▪ Offer condoms and advice on safer sex practices.</li> <li>▪ Where treatment not supplied via a sexual health clinic ensure the individual has contact details of local sexual health services.             <ul style="list-style-type: none"> <li>- Sexual Health Clinic Tel No: 0300 123 0994</li> <li>- <a href="#">Sexual Health Service Information</a></li> </ul> </li> </ul>
<p><b>Follow up treatment</b></p>	<ul style="list-style-type: none"> <li>▪ The individual should be advised to seek medical advice in the event of an adverse reaction.</li> <li>▪ Individuals with Chlamydia trachomatis who have not had a full sexually transmitted infections (STIs) screen (or who did not have Chlamydia trachomatis diagnosed in a sexual health clinic) should be advised to attend a sexual health clinic/service for a full STI screen.</li> <li>▪ Routine follow-up/TOC (test of cure) for uncomplicated Chlamydia trachomatis following treatment with azithromycin is unnecessary, except in the following situations:             <ul style="list-style-type: none"> <li>- Pregnancy.</li> <li>- Where poor compliance is suspected.</li> <li>- Where symptoms persist.</li> <li>- Rectal infections.</li> <li>- Under 25-year-olds.</li> <li>- Mycoplasma genitalium infection.</li> </ul> </li> </ul>

	<p>TOC should be performed &gt;3 weeks after treatment.  <a href="#">Chlamydia trachomatis/urethritis (microguide.global)</a></p>
<p><b>Records</b></p>	<p>In discussion with the individual enter consultation details onto the relevant module within PharmOutcomes or complete the paper proforma if unable to access PharmOutcomes at the time of the consultation.</p> <ul style="list-style-type: none"> <li>▪ Informed verbal consent should be obtained.</li> <li>▪ Consent:             <ul style="list-style-type: none"> <li>- If individual is under 13 years of age record action taken</li> <li>- If individual is under 16 years of age document capacity using Fraser guidelines. If not competent, record action taken.</li> <li>- If individual over 16 years of age and not competent, record action taken.</li> </ul> </li> <li>▪ If a safeguarding referral is made, a record of the referral must be maintained in the pharmacy.</li> <li>▪ If individual not treated under PGD record action taken</li> <li>▪ If the individual is excluded, a record of the reason for exclusion must be documented within PharmOutcomes, and any specific advice that has been given.</li> <li>▪ Name of individual, address, date of birth.</li> <li>▪ GP contact details where appropriate.</li> <li>▪ Relevant past and present medical and sexual history, including medication history.</li> <li>▪ Examination or microbiology finding/s where relevant.</li> <li>▪ Any known allergies and nature of reaction.</li> <li>▪ Name of registered health professional.</li> <li>▪ Name of medication supplied.</li> <li>▪ Date of supply.</li> <li>▪ Dose supplied.</li> <li>▪ Quantity supplied including batch number and expiry date.</li> <li>▪ Advice given about the medication including side effects, benefits, and when and what to do if any concerns.</li> <li>▪ Advice given, including advice given if excluded or declines treatment.</li> <li>▪ Details of any adverse drug reactions and actions taken.</li> <li>▪ Any referral arrangements made.</li> <li>▪ Any supply outside the terms of the product marketing authorisation.</li> <li>▪ Recorded that supplied via Patient Group Direction (PGD)</li> <li>▪ Records should be signed and dated (or a password-controlled e-records) and securely kept for adults for a period of 10 years after attendance and for children until the child is 25 years old.</li> <li>▪ Computerised patient medication records of all individuals receiving treatment under this PGD are recommended to be kept.</li> <li>▪ All records should be clear, legible, and contemporaneous.</li> </ul>

## Appendix A – Registered health professional authorisation sheet

Operation of this PGD is the responsibility of the commissioner and service providers.

<b>PGD Name / Version</b>	Supply of Azithromycin 250/500mg tablets for the treatment of uncomplicated Chlamydia trachomatis in Community Pharmacy / Version No: 3.0 / 2024
<b>Valid from</b>	
<b>Expiry</b>	

- This page must be completed and retained by each individual Pharmacist who intends to work in accordance with this PGD.
- The practitioner must be authorised by name, under the current version of this PGD before working according to it.
- Before signing this PGD, check that the document has had the necessary authorisations and is the up to date and correct version. Without these, this PGD is not lawfully valid.

### Registered health professional

- By signing this patient group direction, you are indicating that you agree to its contents and that you will work within it.
- Patient group directions do not remove inherent professional obligations or accountability.

### Professional Responsibility and Declaration

- I have successfully completed the relevant training as outlined in the Service Specification and this Patient Group Direction.
- I agree to maintain my clinical knowledge appropriate to my practice in order to maintain competence to deliver this service.
- I am a registered pharmacist with the General Pharmaceutical Council.
- I confirm that indemnity insurance is in place to cover my scope of practice.
- I confirm that I have read and understood the content of this Patient Group Direction.
- I agree to supply medications listed only in accordance with the PGD.
- I am willing and competent to practise only within the bounds of my own competence and professional code of conduct.

Name	Designation	Signature	Date

### Authorising manager

I confirm that the registered health professionals named above have declared themselves suitably trained and competent to work under this PGD. I give authorisation on behalf of [insert name of organisation](#) for the above-named health care professionals who have signed the PGD to work under it.

Name	Designation	Signature	Date

### Note to authorising manager.

Score through unused rows in the list of registered health professionals to prevent additions post managerial authorisation.

This authorisation sheet should be retained to serve as a record of those registered health professionals authorised to work under this PGD.

[Add details on how this information is to be retained according to organisation PGD policy.](#)
